Bizzar

The building solutions

BizzAR[®]

The acoustic properties of concrete are defined as its ability to reduce the transmission of sound through it. The density of standard concrete mixes can, in relatively small thicknesses, provide sufficient mass to reflect sound.

We work to ensure the best sound environment for every need.

Founded in 2020 as engineering service provider for architecture.

Concrete Black ACR1020

ACCOCRETE Coating are basically design to give the acoustic and thermal insulation properties for interior and exterior in the building. These coating are made with selected light weight concrete granules and lime bonded with water born chemicals. Accocrete coatings are having very good resistance against water and fire.

Concrete Grey ACR1021

Concrete White ACR1022

Concrete Red ACR1023

Concrete Yellow ACR1024

Concrete Blue ACR1025

Concrete Green ACR1026

Concrete Sky Blue ACR1027

Concrete Pink ACR1028

Concrete Mix ACR1029

Concrete Mix ACR1030

Concrete Mix1031

Concrete Mix ACR1032

Environment friendly processes, or environmental-friendly processes are sustainability and marketing terms referring to goods and services, laws, guidelines and policies that claim reduced, minimal, or no harm upon ecosystems or the environment.

Low VOC refers to volatile organic compounds that are not harmful to the environment and humans. It mostly refers to paints and other products that have a very low or zero VOC, e.g. sealants, adhesives and cleaners. Low VOCs are good for both the environment and living organisms

Solvent-free refers to a substance that contains little or no solvent. Solvent-free or water based paint is also considered to be kinder to the environment. Solvent-free paints are used to protect against corrosion, just like solvent based paints

Free of hazardous chemicals, full of performance. Non-Haz FRHF 46 and Non-Haz 32 & 46 were formulated to enhance performance without the toxic chemicals that are harmful to the environment and require hazardous waste removal.

Lead free paint is defined as a paint that does not contain any white lead in it or similar lead compounds. Since 1997, no domestic paint has been allowed to contain more than 0.1 percent of lead.
